ABOUT THE FACULTY

The faculty was founded in 2007 in accordance with the agreement on the establishment of the Academic educational and scientific center of the Russian Academy of Sciences and Lomonosov Moscow State University.
MISSION OF THE FACULTY

The main task of the faculty is to train highly-qualified specialists in the field of social sciences, specialists, who possess theoretical knowledge, analytical thinking and practical skills, and are focused on the inclusion of social knowledge in the scientific governance of society.
What do the words «contemporary social sciences» mean?

• Students will get acquainted with the latest world standard of science development, modern research, the latest scientific literature.

• New disciplines.

• Application of an interdisciplinary approach in teaching practice.
The inclusion of students in a scientific research project based on modeling real situations from current Russian reality, for example:

- Use of data from social networks in the society governance system;
- Social management in a crisis or emergency;
- Overcoming ethno-political and social conflicts;
- Transition of society to the digital stage of development;
- Resource allocation control.
OSIPOV GENNADY VASILIEVICH
Director of Higher School of Contemporary Social Sciences, Academician

Science of the future is based on the convergence of sciences and technologies, the synthesis of natural-scientific and social knowledge. If a scientist knows nothing but, for example, Chemistry, then he does not know even this science fully enough. In social sciences, it is not enough to be only a historian or psychologist, as well as only an economist or sociologist. Study of modern social reality now requires interdisciplinary knowledge. The goal of our faculty is to help students to master this knowledge.
